

Easy Erf Report

Erf 42

St Francis Bay, Kouga Local Municipality, Eastern Cape

Human-reviewed investigation.

Reviewed by Synthetic reviewer on 2026/09/19, 17:00:00.

Version and evidence record

Version 00000000-0000-4000-8000-000000000003 · Evidence revision 1 · Brief revision 1

The assessment

Decision not ready — conflicting evidence

SYNTHETIC: visual readiness regression only, not a property assessment.

Parcel identity read from the official cadastral record

Official cadastral extent 600 m²

Registered extent read from an uploaded document

Evidence readiness 43%. Evidence for this erf currently contradicts itself.

Satellite context · recorded parcel boundary

Satellite context with the recorded parcel boundary. The overlay is property context, not a survey or boundary confirmation.

Portion	Suburb / area	Town	Erf size
Portion 0	Sea Vista	St Francis Bay	600 m²
Official parcel identity	Official parcel context	Official parcel context	Official cadastral record

Buy & Hold

Purchase price

R 1,200,000

User assumption

Annual net operating income

R 103 800

Calculated from saved assumptions

Net yield

8.65%

Calculated from saved assumptions

Saved scenario, not a valuation or a forecast. Changing the inputs changes the outcome.

What could change the decision

Cadastral area and registered extent differ

Official cadastral area 600 m² vs registered extent 580 m².

Still unverified: Servitudes / SG; Buildings & Plans; Zoning & Use. These are gaps in evidence, not confirmed defects.

What to do next

1. Next best action

Attach the Surveyor-General diagram

The SG diagram is the primary cadastral record of erf shape, dimensions and parent lineage. Without it the boundary and area stay approximate.

Steps and supporting sources

Easy Erf records readable cadastral evidence. A parent General Plan remains contextual evidence, and the individual subject SG diagram remains a confidence upgrade.

1. Open the Sources tab and scroll to the SG diagram section.
 2. Use the SG document link to download the diagram for this erf.
 3. Upload the file to the Erf File Vault.
 4. Confirm the original file was saved and review its preview. You can continue without AI interpretation.
 5. If you choose AI interpretation, explicitly allow processing and start Read diagram. Review its result before relying on extracted evidence.
-

2.

Save more comparable listings or sales.

Market summary needs at least three relevant included comparables.

Steps and supporting sources

Save more comparable listings or sales, and the result is saved against this erf.

3.

Confirm the property's planning controls

Zoning is recorded as a working or published value, but no supported property-specific source confirms it.

6 checks in this action

Verify zoning with municipal planning records.

Verify zoning with municipal planning records, and the result is saved against this erf.

Verify coverage with municipal planning records.

Verify coverage with municipal planning records, and the result is saved against this erf.

Verify far with municipal planning records.

Verify far with municipal planning records, and the result is saved against this erf.

Verify height with municipal planning records.

Verify height with municipal planning records, and the result is saved against this erf.

Verify permitted uses with municipal planning records.

Verify permitted uses with municipal planning records, and the result is saved against this erf.

Verify setbacks or building lines with municipal planning records.

Verify setbacks or building lines with municipal planning records, and the result is saved against this erf.

Professional search near St Francis Bay, Kouga Local Municipality, Eastern Cape. External results, not an Easy Erf endorsement.

Investigation editing is unavailable in this report view. Use the evidence links to review recorded sources.

Full reviewer assessment and review provenance

Human-reviewed investigation summary

Written and approved by the human reviewer from the frozen investigation evidence. No AI synthesis was used for this summary. The underlying evidence and provenance remain in the full report below.

Bottom line

SYNTHETIC: visual readiness regression only, not a property assessment.

What we know

Synthetic parcel and controlled preview.

What appears possible

Nothing established for a real property.

What could be a problem

No official evidence was acquired.

What we do not know yet

Provider integration pending.

What should be verified next

Obtain authorized professional evidence.

Property checks, services and location

PROPERTY CHECKS

Physical and environmental evidence

WHAT THE EVIDENCE SUPPORTS

No physical constraint has been established from evidence

Nothing has been read that describes slope, flooding, drainage, coastal setbacks or environmental status for this erf.

SLOPE / TOPOGRAPHY

Not established

NOT ESTABLISHED

No topographical survey or geotechnical note has been read for this erf.

PHYSICAL ACCESS

Not established

NOT ESTABLISHED

No document states how this erf is physically accessed.

ORIENTATION / ASPECT

Not established

NOT ESTABLISHED

Orientation has not been recorded from a diagram or site assessment.

WIND EXPOSURE

Not established

NOT ESTABLISHED

Wind exposure has not been assessed or recorded for this erf.

DRAINAGE / STORMWATER

Not established

NOT ESTABLISHED

No drainage or stormwater information has been read for this erf.

FLOOD RISK

Not established

NOT ESTABLISHED

No flood-line or flood-risk determination has been obtained.

COASTAL / SETBACK STATUS

BIODIVERSITY, WETLANDS & PROTECTED AREAS

Not established

NOT ESTABLISHED

No coastal management line or setback determination has been obtained.

Not established

NOT ESTABLISHED

No environmental screening result has been recorded for this erf.

HERITAGE STATUS

Not established

NOT ESTABLISHED

Heritage status has not been confirmed with the heritage authority.

OUTSTANDING CHECKS

Flood-line and stormwater determination — Request the municipal flood-line determination or commission a civil engineer.

Geotechnical and slope assessment — Commission a geotechnical report before assuming the site is buildable as-is.

Environmental screening — Run a national environmental screening report to test biodiversity, wetland and protected-area triggers.

Coastal management line check — Confirm the coastal management line and setback with the provincial authority.

Unknown is not the same as cleared. Easy Erf never marks a physical or environmental check as clear because evidence is missing, and opening a portal is not a finding.

Add specialist reports or official determinations to the Erf File Investigation changes are unavailable in this report view.

MUNICIPAL SERVICES & OWNERSHIP COSTS

What it actually costs to hold this erf

WHAT THE EVIDENCE SUPPORTS

No ownership-cost item is supported by evidence yet

Rates, levies and service charges change the true cost of holding this erf. Only amounts read from an identity-matched document are shown.

ESTIMATED MONTHLY OWNERSHIP COST

No monthly ownership cost can be shown. No document states a monthly rates, levy or service amount for this erf, and Easy Erf will not estimate one.

MUNICIPAL VALUATION

Not established

NOT ESTABLISHED

No municipal roll value has been read from an identity-matched document.

RATES

Not established

NOT ESTABLISHED

No rates amount has been read from a municipal account or report.

LEVIES

Not established

NOT ESTABLISHED

No levy amount has been read. Estate or sectional-title levies may still apply.

WATER

Not established

NOT ESTABLISHED

No water connection status has been confirmed with the municipality.

SEWER / SEPTIC

Not established

NOT ESTABLISHED

No sewer or septic arrangement has been confirmed for this erf.

ELECTRICITY

Not established

NOT ESTABLISHED

No electricity connection or supply authority has been confirmed.

REFUSE

Not established

NOT ESTABLISHED

No refuse service has been confirmed for this erf.

ROAD ACCESS

Not established

NOT ESTABLISHED

No document states the road access or road surface for this erf.

ACCOUNT STATUS / ARREARS

Not established

NOT ESTABLISHED

No municipal account statement has been supplied, so arrears are unknown.

OUTSTANDING CHECKS

Municipal valuation — Request the municipal valuation roll entry and current rates account.

Rates — Request the municipal valuation roll entry and current rates account.

Levies — Confirm this service directly with the municipality or service authority.

Water — Confirm this service directly with the municipality or service authority.

Sewer / septic — Confirm this service directly with the municipality or service authority.

Electricity — Confirm this service directly with the municipality or service authority.

Refuse — Confirm this service directly with the municipality or service authority.

Road access — Confirm this service directly with the municipality or service authority.

Account status / arrears — Request a municipal account statement or rates clearance figures.

Easy Erf never shows R0 for an unknown amount and never estimates a charge that no document states.

Add municipal account or service evidence Investigation changes are unavailable in this report view.

LOCATION

Location context

WHAT THE EVIDENCE SUPPORTS

1 location fact(s) supported by evidence

Official and map-derived facts, listing-derived descriptions and your own confirmed observations are kept apart, so marketing language never becomes a fact.

CONFIRMED ADDRESS

Not established

NOT ESTABLISHED

No street address has been confirmed for this erf yet.

MUNICIPALITY & PROVINCE

Kouga Local Municipality · Eastern Cape

OFFICIAL / MAP-DERIVED

Official cadastral attributes for this parcel.

MAP POSITION

Not established

NOT ESTABLISHED

No parcel geometry is available for this erf.

DISTANCE TO BEACH / COASTLINE

Not established

NOT ESTABLISHED

No measured distance or travel time exists in the evidence. Easy Erf does not estimate one.

DISTANCE TO TOWN CENTRE

Not established

DISTANCE TO SHOPS

Not established

NOT ESTABLISHED

No measured distance or travel time exists in the evidence. Easy Erf does not estimate one.

NOT ESTABLISHED

No measured distance or travel time exists in the evidence. Easy Erf does not estimate one.

DISTANCE TO SCHOOLS

Not established

NOT ESTABLISHED

No measured distance or travel time exists in the evidence. Easy Erf does not estimate one.

DISTANCE TO MEDICAL FACILITIES

Not established

NOT ESTABLISHED

No measured distance or travel time exists in the evidence. Easy Erf does not estimate one.

ROAD ACCESS

Not established

NOT ESTABLISHED

No document states the road access for this erf.

VIEWS

Not established

NOT ESTABLISHED

No view description has been captured from a listing or your own site notes.

NOISE

Not established

NOT ESTABLISHED

No noise observation has been recorded for this erf.

NEIGHBOURHOOD CHARACTER

Not established

NOT ESTABLISHED

No neighbourhood description has been recorded from evidence or your notes.

NEARBY DEVELOPMENT ACTIVITY

Not established

NOT ESTABLISHED

No nearby development activity has been recorded for this area.

OUTSTANDING CHECKS

Confirmed address — Record what you observed on site, or attach a source that states it.

Map position — Record what you observed on site, or attach a source that states it.

Distance to beach / coastline — Measure the distance yourself and save it as a property note.

Distance to town centre — Measure the distance yourself and save it as a property note.

Distance to shops — Measure the distance yourself and save it as a property note.

Distance to schools — Measure the distance yourself and save it as a property note.

Easy Erf never invents a distance, a travel time or a lifestyle claim. Anything not stated by a source stays blank with a next step.

Add site observations in Notes Investigation changes are unavailable in this report view.

All findings, conflicts and follow-up actions

EVIDENCE FINDINGS

Recorded findings and conflicts

SUPPORTED BY EVIDENCE

Parcel identity read from the official cadastral record

Erf number: 42 · LPI: C00000000000004200000 · Portion: 0

Identifiers come from the official parcel layer. Confirming them yourself removes the risk of researching the wrong erf.

Source: [Synthetic official parcel fixture](#)

SUPPORTED BY EVIDENCE

Official cadastral extent 600 m²

The official parcel record states 600 m².

This is the cadastral area used for area-based calculations unless a registered deed extent is confirmed.

Source: [Synthetic official parcel fixture](#)

SUPPORTED BY EVIDENCE

Registered extent read from an uploaded document

The uploaded document states a registered extent of 580.

A registered extent is the deed/diagram figure. It is kept separate from the official cadastral area and never overwrites it.

Source: [Synthetic property data report](#)

CONFLICTING EVIDENCE

Cadastral area and registered extent differ

Official cadastral area 600 m² vs registered extent 580 m².

Both figures are kept. A conveyancer or land surveyor must confirm which extent applies before it is used in pricing or planning.

Source: [Synthetic official parcel fixture](#); [Synthetic property data report](#)

SUPPORTED BY EVIDENCE

Ownership details read from an identity-matched report

Registered owner: Example Holdings (synthetic)

These values were read from a document matched to this erf. Easy Erf does not certify ownership; a conveyancer must confirm it before any legal reliance.

Source: [Synthetic property data report](#)

NOT CHECKED

Working planning assumptions recorded

Maximum coverage: 50 (user-confirmed working conclusion) · Zoning: Residential Zone 1 (single residential) (user-confirmed working conclusion)

A working planning basis exists for the investigation, but it is not municipal confirmation or an approval to build. Obtain the property-specific zoning and planning records before relying on it.

Source: [Selected manually by the user: Kouga Land Use Scheme 2021](#)

MISSING EVIDENCE

No market evidence saved

No listing or comparable has been saved against this erf.

Asking prices are not sold prices. Saved listings indicate the asking market only and are never a formal valuation.

No supporting source attached.

NOT CHECKED

Strategy assumptions saved

Buy & Hold: monthlyRent: 11000 · Buy & Hold: operatingExpenses: 1800 · Buy & Hold: purchasePrice: 1200000 · Buy & Hold: vacancyRate: 5

Strategy figures are your own assumptions and calculations. They are not valuations, quotes or feasibility approvals.

Source: [Strategy workspace](#)

NOT CHECKED

1 document(s) in the Erf File Vault

synthetic-property-report.pdf

Only documents that are readable and matched to this erf become evidence. Storage alone does not verify anything.

Source: [Synthetic property data report](#)

All follow-up actions

1. Next best action

Attach the Surveyor-General diagram

The SG diagram is the primary cadastral record of erf shape, dimensions and parent lineage. Without it the boundary and area stay approximate.

Steps and supporting sources

Easy Erf records readable cadastral evidence. A parent General Plan remains contextual evidence, and the individual subject SG diagram remains a confidence upgrade.

1. Open the Sources tab and scroll to the SG diagram section.
 2. Use the SG document link to download the diagram for this erf.
 3. Upload the file to the Erf File Vault.
 4. Confirm the original file was saved and review its preview. You can continue without AI interpretation.
 5. If you choose AI interpretation, explicitly allow processing and start Read diagram. Review its result before relying on extracted evidence.
-

2.

Save more comparable listings or sales.

Market summary needs at least three relevant included comparables.

Steps and supporting sources

Save more comparable listings or sales, and the result is saved against this erf.

3.

Confirm the property's planning controls

Zoning is recorded as a working or published value, but no supported property-specific source confirms it.

6 checks in this action

Verify zoning with municipal planning records.

Verify zoning with municipal planning records, and the result is saved against this erf.

Verify coverage with municipal planning records.

Verify coverage with municipal planning records, and the result is saved against this erf.

Verify far with municipal planning records.

Verify far with municipal planning records, and the result is saved against this erf.

Verify height with municipal planning records.

Verify height with municipal planning records, and the result is saved against this erf.

Verify permitted uses with municipal planning records.

Verify permitted uses with municipal planning records, and the result is saved against this erf.

Verify setbacks or building lines with municipal planning records.

Verify setbacks or building lines with municipal planning records, and the result is saved against this erf.

Professional search near St Francis Bay, Kouga Local Municipality, Eastern Cape. External results, not an Easy Erf endorsement.

4.

Confirm a market address in Market.

No user-confirmed working market address is saved.

Steps and supporting sources

Confirm a market address in Market, and the result is saved against this erf.

5.

Reconcile the official cadastral area with the registered extent through a land surveyor or conveyancer.

The official cadastral record states 600 m2 while a matched document states a registered extent of 580 m2. Easy Erf keeps both values and does not choose between them.

Steps and supporting sources

Reconcile the official cadastral area with the registered extent through a land surveyor or conveyancer, and the result is saved against this erf.

Professional search near St Francis Bay, Kouga Local Municipality, Eastern Cape. External results, not an Easy Erf endorsement.

6.

Upload or fetch the SG diagram.

No SG diagram is attached for this erf.

Steps and supporting sources

Upload or fetch the SG diagram, and the result is saved against this erf.

Professional search near St Francis Bay, Kouga Local Municipality, Eastern Cape. External results, not an Easy Erf endorsement.

7.

Import or add the active listing for this erf if one exists.

No active listing is saved as the subject listing for this erf.

Steps and supporting sources

Import or add the active listing for this erf if one exists, and the result is saved against this erf.

Investigation editing is unavailable in this report view. Use the evidence links to review recorded sources.

Documents, source references and investigation record

Sources checked and remaining limitations

No source-check records have been saved yet.

EVIDENCE & DOCUMENTS

Every source this report can see

Storing a file does not make it evidence. Each row states whether Easy Erf actually read the document and whether it matched this erf. Wrong-property and unreadable documents stay visible and stay excluded.
