

Erf 1021

St Francis Bay, Kouga Local Municipality, Eastern Cape

Self-service investigation · Not human reviewed.

The assessment

Worth investigating, subject to checks

Enough evidence exists to keep going, but material checks are still outstanding for this erf.

- Parcel identity read from the official cadastral record
- Official cadastral extent 900 m²
- Ownership details from user-attached evidence

Evidence readiness 43%. 4 of 8 tracked categories are supported by recorded evidence.

Satellite context · recorded property location
Satellite context for the recorded property location. No parcel boundary is shown unless saved geometry is available.

Municipal value

The numbers

No selected Strategy figures are available. Purchase, costs and returns have not been established.

What could change the decision

Still unverified: Servitudes / SG; Buildings & Plans; Zoning & Use. These are gaps in evidence, not confirmed defects.

What to do next

1. 1.Next best action

Confirm this is the right erf

Every later conclusion — planning, market, strategy and the report — is only as reliable as the parcel identity behind it.

▼ Steps and supporting sources

- Easy Erf unlocks the downstream evidence tasks and stops treating the parcel identity as unconfirmed.
 1. Open the Sources tab.
 2. Compare the erf number, portion and municipality with the property you are researching.
 3. Open the official CSG or municipal source link to cross-check the parcel.
 4. Mark the identity as looks correct, or flag it as uncertain.

2. 2.

Choose a scenario in Strategy Lab.

No Strategy scenario is selected to feed the Easy Erf Report.

▼ Steps and supporting sources

- Choose a scenario in Strategy Lab, and the result is saved against this erf.

3. 3.

Save more comparable listings or sales.

Market summary needs at least three relevant included comparables.

▼ Steps and supporting sources

- Save more comparable listings or sales, and the result is saved against this erf.

[View all 8 grouped actions](#)

Ask Easy Erf is an interactive feature of the live report. It answers only from the evidence recorded for this erf and is unavailable in a printed copy.

Cadastral evidence

Combined SG Evidence Pack

No Surveyor-General diagram has been read for this erf yet. Upload the SG diagram in the Erf File to add cadastral evidence.

Ownership & Deeds

Ownership and deeds evidence; not certified by Easy Erf

Owner details below retain their individual source provenance. User attachment does not establish an independent identity match, and a separately matched source does not upgrade it. Easy Erf does not certify ownership; a conveyancer must confirm it before legal reliance.

Site Potential

What could potentially be built here?

No accepted build envelope has been recorded for this erf yet.
No accepted build envelope has been recorded for this erf yet.

Theoretical and estimated. Not approved plans. A deterministic working envelope is not municipal approval or an approved building plan.

▼ Market evidence and Strategy assumptions
Market Evidence

No market evidence saved for this erf

No market evidence has been saved for this erf yet.

Municipal valuation
R 450 000
Evidence input

Read from asset-matched

Municipal roll value for rating purposes, not a market valuation.

Subject listing

No subject listing has been attached to this erf.

Asking versus sold

Asking-price evidence
0

Sold evidence
0

Missing market evidence

- No asking price captured for the subject property.
- Too few comparables to justify an indicative range.

Strategy & Financials

No strategy scenario chosen yet

Strategy figures come from your saved Strategy Lab scenario exactly as calculated there. They are assumptions and deterministic calculations, never valuations or feasibility approvals.

No strategy scenario has been chosen for this report. Open Strategy Lab to test purchase, build, flip and hold assumptions, then choose a scenario.

0 saved scenarios in the Strategy workspace.

Property checks

Physical and environmental evidence

What the evidence supports

No physical constraint has been established from evidence

Nothing has been read that describes slope, flooding, drainage, coastal setbacks or environmental status for this erf.

Slope / topography
Not established
Not established

No topographical survey or geotechnical note has been read for this erf.

Physical access
Not established
Not established

No document states how this erf is physically accessed.

Orientation / aspect
Not established
Not established

Orientation has not been recorded from a diagram or site assessment.

Wind exposure
Not established
Not established

Wind exposure has not been assessed or recorded for this erf.

Drainage / stormwater
Not established
Not established

No drainage or stormwater information has been read for this erf.

Flood risk
Not established
Not established

No flood-line or flood-risk determination has been obtained.

Coastal / setback status
Not established
Not established

No coastal management line or setback determination has been obtained.

Biodiversity, wetlands & protected areas
Not established
Not established

No environmental screening result has been recorded for this erf.

Heritage status
Not established
Not established

Heritage status has not been confirmed with the heritage authority.

Outstanding checks

- Flood-line and stormwater determination — Request the municipal flood-line determination or commission a civil engineer.
- Geotechnical and slope assessment — Commission a geotechnical report before assuming the site is buildable as-is.
- Environmental screening — Run a national environmental screening report to test biodiversity, wetland and protected-area triggers.
- Coastal management line check — Confirm the coastal management line and setback with the provincial authority.

Unknown is not the same as cleared. Easy Erf never marks a physical or environmental check as clear because evidence is missing, and opening a portal is not a finding.

Add specialist reports or official determinations to the Erf File Investigation changes are unavailable in this report view.

Municipal Services & Ownership Costs

What it actually costs to hold this erf

What the evidence supports

2 of 9 ownership-cost items supported by evidence

Rates, levies and service charges change the true cost of holding this erf. Recorded amounts retain their source provenance and confidence; inclusion does not establish a document identity match.

Estimated monthly ownership cost

No monthly ownership cost can be shown. No document states a monthly rates, levy or service amount for this erf, and Easy Erf will not estimate one.

Municipal valuation

R 450 000

Recorded evidence; check source provenance

Read from asset-matched · page 3 · confidence medium

Municipal roll value for rating purposes, not a market valuation.

Rates

Not established

Not established

No rates amount has been read from a municipal account or report.

Levies

Not established

Not established

No levy amount has been read. Estate or sectional-title levies may still apply.

Water

Recorded connection

Recorded evidence; check source provenance

Read from asset-matched · page 4 · confidence medium

Sewer / septic

Not established

Not established

No sewer or septic arrangement has been confirmed for this erf.

Electricity

Not established

Not established

No electricity connection or supply authority has been confirmed.

Refuse

Not established

Not established

No refuse service has been confirmed for this erf.

Road access

Not established

Not established

No document states the road access or road surface for this erf.

Account status / arrears
Not established
Not established

No municipal account statement has been supplied, so arrears are unknown.

Outstanding checks

- Rates — Request the municipal valuation roll entry and current rates account.
- Levies — Confirm this service directly with the municipality or service authority.
- Sewer / septic — Confirm this service directly with the municipality or service authority.
- Electricity — Confirm this service directly with the municipality or service authority.
- Refuse — Confirm this service directly with the municipality or service authority.
- Road access — Confirm this service directly with the municipality or service authority.
- Account status / arrears — Request a municipal account statement or rates clearance figures.

Easy Erf never shows R0 for an unknown amount and never estimates a charge that no document states.

Add municipal account or service evidence Investigation changes are unavailable in this report view.

Location

Location context

What the evidence supports

2 location fact(s) supported by evidence

Official and map-derived facts, listing-derived descriptions and your own confirmed observations are kept apart, so marketing language never becomes a fact.

Confirmed address
Not established
Not established

No street address has been confirmed for this erf yet.

Municipality & province
Kouga Local Municipality · Eastern Cape
Official / map-derived

Official cadastral attributes for this parcel.

Map position
-34.15100, 24.83100
Official / map-derived

Derived from the official parcel geometry.

Distance to beach / coastline
Not established
Not established

No measured distance or travel time exists in the evidence. Easy Erf does not estimate one.

Distance to town centre
Not established
Not established

No measured distance or travel time exists in the evidence. Easy Erf does not estimate one.

Distance to shops
Not established

Not established

No measured distance or travel time exists in the evidence. Easy Erf does not estimate one.

Distance to schools

Not established

Not established

No measured distance or travel time exists in the evidence. Easy Erf does not estimate one.

Distance to medical facilities

Not established

Not established

No measured distance or travel time exists in the evidence. Easy Erf does not estimate one.

Road access

Not established

Not established

No document states the road access for this erf.

Views

Not established

Not established

No view description has been captured from a listing or your own site notes.

Noise

Not established

Not established

No noise observation has been recorded for this erf.

Neighbourhood character

Not established

Not established

No neighbourhood description has been recorded from evidence or your notes.

Nearby development activity

Not established

Not established

No nearby development activity has been recorded for this area.

Outstanding checks

- Confirmed address — Record what you observed on site, or attach a source that states it.
- Distance to beach / coastline — Measure the distance yourself and save it as a property note.
- Distance to town centre — Measure the distance yourself and save it as a property note.
- Distance to shops — Measure the distance yourself and save it as a property note.
- Distance to schools — Measure the distance yourself and save it as a property note.
- Distance to medical facilities — Measure the distance yourself and save it as a property note.

Easy Erf never invents a distance, a travel time or a lifestyle claim. Anything not stated by a source stays blank with a next step.

Add site observations in Notes Investigation changes are unavailable in this report view.

Evidence findings

Recorded findings and conflicts

Supported by evidence

Parcel identity read from the official cadastral record

Erf number: 1021 · LPI: C03400140000102100000 · Parcel key: E108C034001400001021000000 · Portion: 0

Identifiers come from the official parcel layer. Confirming them yourself removes the risk of researching the wrong erf.

Source: [Kouga SG Properties](#)

Supported by evidence

Official cadastral extent 900 m²

The official parcel record states 900 m².

This is the cadastral area used for area-based calculations unless a registered deed extent is confirmed.

Source: [Kouga SG Properties](#)

Supported by evidence

Ownership details from user-attached evidence

Owner: Synthetic owner (identity-matched source) · Owner: Synthetic owner (user-attached; document identity not independently matched)

Each value retains its own document provenance. A matched source does not upgrade a separate user-attached source. Easy Erf does not certify ownership; a conveyancer must confirm it before any legal reliance.

Source: [SG diagram](#); [SG diagram](#)

Supported by evidence

Title deed details on file

Deed number: T123/2026 · Deed number: T123/2026

Deed values are document-derived and must still be confirmed against the deeds office record.

Source: [SG diagram](#); [SG diagram](#)

Missing evidence

No planning controls recorded

No zoning, coverage, FAR or height value exists for this erf.

What may legally be built cannot be established until the municipal zoning certificate and scheme controls are confirmed. Repeating the same source does not strengthen this.

No supporting source attached.

Missing evidence

No market evidence saved

No listing or comparable has been saved against this erf.

Asking prices are not sold prices. Saved listings indicate the asking market only and are never a formal valuation.

No supporting source attached.

Missing evidence

No strategy scenario saved

No Strategy Lab scenario has been saved for this erf.

Strategy figures are your own assumptions and calculations. They are not valuations, quotes or feasibility approvals.

No supporting source attached.

Not checked

2 document(s) in the Erf File Vault

matched.pdf · report.pdf

Readable matched documents and explicitly user-attached working evidence retain different identity provenance. Parent documents remain context only; mismatched documents are excluded. Storage alone does not verify anything.

All follow-up actions

1. 1.Next best action

Confirm this is the right erf

Every later conclusion — planning, market, strategy and the report — is only as reliable as the parcel identity behind it.

▼ Steps and supporting sources

- Easy Erf unlocks the downstream evidence tasks and stops treating the parcel identity as unconfirmed.
 1. Open the Sources tab.
 2. Compare the erf number, portion and municipality with the property you are researching.
 3. Open the official CSG or municipal source link to cross-check the parcel.
 4. Mark the identity as looks correct, or flag it as uncertain.

2. 2.

Choose a scenario in Strategy Lab.

No Strategy scenario is selected to feed the Easy Erf Report.

▼ Steps and supporting sources

- Choose a scenario in Strategy Lab, and the result is saved against this erf.

3. 3.

Save more comparable listings or sales.

Market summary needs at least three relevant included comparables.

▼ Steps and supporting sources

- Save more comparable listings or sales, and the result is saved against this erf.

4. 4.

Review the official identity in Sources.

The official parcel identity has not been marked as checked for this erf.

▼ Steps and supporting sources

- Review the official identity in Sources, and the result is saved against this erf.

5. 5.

Confirm the property's planning controls

Zoning has not been captured from a supported source.

▼ 6 checks in this action

- Verify zoning with municipal planning records.

Verify zoning with municipal planning records, and the result is saved against this erf.

- Verify coverage with municipal planning records.

Verify coverage with municipal planning records, and the result is saved against this erf.

- Verify far with municipal planning records.

Verify far with municipal planning records, and the result is saved against this erf.

- Verify height with municipal planning records.

Verify height with municipal planning records, and the result is saved against this erf.

- Verify permitted uses with municipal planning records.

Verify permitted uses with municipal planning records, and the result is saved against this erf.

- Verify setbacks or building lines with municipal planning records.

Verify setbacks or building lines with municipal planning records, and the result is saved against this erf.

Professional search near St Francis Bay, Kouga Local Municipality, Eastern Cape. External results, not an Easy Erf endorsement.

6. 6.

Confirm a market address in Market.

No user-confirmed working market address is saved.

▼ Steps and supporting sources

- Confirm a market address in Market, and the result is saved against this erf.

7. 7.

Upload or fetch the SG diagram.

No SG diagram is attached for this erf.

▼ Steps and supporting sources

- Upload or fetch the SG diagram, and the result is saved against this erf.

Professional search near St Francis Bay, Kouga Local Municipality, Eastern Cape. External results, not an Easy Erf endorsement.

8. 8.

Import or add the active listing for this erf if one exists.

No active listing is saved as the subject listing for this erf.

▼ Steps and supporting sources

- Import or add the active listing for this erf if one exists, and the result is saved against this erf.

▼ Documents, source references and investigation record

Sources checked and remaining limitations

No source-check records have been saved yet.

Evidence & Documents

Every source this report can see

Storing a file does not make it evidence. Each row states whether Easy Erf actually read the document and whether it matched this erf. Wrong-property and unreadable documents stay visible and stay excluded.
